Colin de la Higuera

Benjamin Ninassi
Who is Class’Code?
5 MOOCs
#1 | Discover Creative Programming,
#2 | Manipulate the information
#3 | Run the robots
#4 | Connect the network
#5 | Projects

A learning platform/social network [http://classcode.fr](http://classcode.fr)

A large consortium with varied competences

Facilitators
Students, Teachers, Technicians, Engineers

The temps de rencontre close to where you live
Lessons learnt and Challenges

• **Research matters:** we need a much more systematic observation of what happens in the classroom when learning informatics
  • How we teach is at least as important an issue as what we teach
• **We have to diminish the expectancy gap:**
  • For Informatics specialists, Class’Code is far too little
  • For school authorities, Class’Code is far too much
• **Learning takes time**
  • Those who wanted to be convinced are going to be convinced
  • For the others, institutional help is essential
• We have to **innovate**, adapt

Class’Code 2.0
