Faculty of Mathematics and Informatics,
Computer Science institute

Where are the Terms of Service?

Vilnius
University

The image shows the Facebook 'Create a new account' form. At the top is the Facebook logo. Below it, the heading 'Create a new account' is followed by the subtext 'It's quick and easy.' The form contains several input fields: 'First name' and 'Last name' (side-by-side), a 'Birthday' section with dropdowns for month (Nov), day (22), and year (2024), a 'Gender' section with radio buttons for 'Female', 'Male', and 'Custom', a 'Mobile number or email' field, and a 'New password' field. Below the fields, there is a small paragraph about contact information upload, another paragraph about agreeing to terms and privacy policies, and a green 'Sign Up' button. At the bottom, there is a link 'Already have an account?'.

[Already have an account?](#)

The image shows a dark-themed sign-up screen. At the top, the text 'Happening now' is in large white font, followed by 'Join today.' Below this are two large white buttons: 'Sign up with Google' (with the Google logo) and 'Sign up with Apple' (with the Apple logo). Between these buttons is the word 'or'. Below 'or' is a blue button labeled 'Create account'. Underneath the blue button is a line of small text: 'By signing up, you agree to the [Terms of Service](#) and [Privacy Policy](#), including [Cookie Use](#).' At the bottom, the text 'Already have an account?' is followed by a white button labeled 'Sign in'.

Outline

- Requirements for presentation on legal provisions.
- Educating software engineers and developers
 - Courses in Vilnius University
 - Student developed guidelines to design the terms of service..
 - Examples of coursework topics.
- Challenges in informing users
- Ideas for further activities for the workgroup p

EU regulation on ensuring users' privacy

1. Privacy Policy and Terms of Service must be separate documents.
2. Consent is freely given.
3. Consent for each purpose.
4. Understandable, not ambiguous
5. Clear affirmative action.
6. Separate consent request.
7. Right to revoke at any time.
8. Do not interfere with the use of service.
9. Clearly defines purposes.
10. Minimum collected data.
11. Consent for each purpose.
12. Data is deleted when no longer needed.
13. Design of Privacy Policy and Terms of Service must be consistent

Dark patterns in requests for consent to use cookies

- **Consent walls** – pop-up windows that block access to the website
- **Tracking walls** – enable users only accept the use of cookies or leave the site
- **Reduced service** is provided when the users do not accept the privacy settings
- **Manipulation of configurations** encourages users to accept the use of cookies

**Vilnius
University**

**Educating future software
engineers**

Ethics topics in VU Computer Science and Software Engineering study programmes

- Bachelor subjects (compulsory for SE, elective for CS)
 - Communication Skills and Ethics in IT Team
 - Human-Computer Interaction – Research and design ethics
- Master subjects
 - Leadership – compulsory
 - User Experience Engineering – research ethics, dark patterns (elective)
 - Cyber Security Technologies – Dark patterns, social engineering (elective)
 - Cyber law and Ethics. Consent and Privacy (compulsory in International Management of Cybersecurity)

Ethics topics in diploma works

- Master diploma topics
 - Dark patterns in persuasive computing
- Bachelor's diploma works
 - Identification of deceptive patterns in Lithuanian user interfaces
 - Users' protection against phishing attacks
 - Dark patterns avoidance in designing cookie consent requests
 - Terms of service usability using information visualization principles

Privacy and security requirements for consent requests

1. Given free will
2. Concrete: expressed by clear affirmative action
3. Accurate information about purposes of data processing
4. Consent given for each purpose
5. Consent request must be separated for other matters
6. Clear, concise and not unnecessarily interrupt the use of the service.
7. Opting out as easy as agreeing
8. User must be able to refuse the use of cookies

Design guidelines

- Consent must be given by a clear approval, for example, by **ticking a checkbox or the touch of a button.**
- Request for **consent must stand out and draw the user's attention** to facilitate making an informed decision by accepting the Terms.
- The information about the data collected must be accurate, clear, and **linked with the processing goals.**
- The information should be supplemented by visualizations, which would facilitate and speed up the perception of the complex text. **For example, Using charts, graphs, and illustrations.**

**Vilnius
University**

Informing users of deceptive patterns and phishing

Ensuring the users' privacy

- Users' devices and their information are recognized as personal space in the EU law
- Service providers must
 - inform the users about the methods of data processing
 - obtain the users' consent for the use of cookies
- Users usually do not understand what they are agreeing to
- Misleading designs (aka dark patterns) are observed in the requests for consent to use cookies
- Designers need the usability guidelines to improve the usability of consent requests

Identification of dark patterns using tools

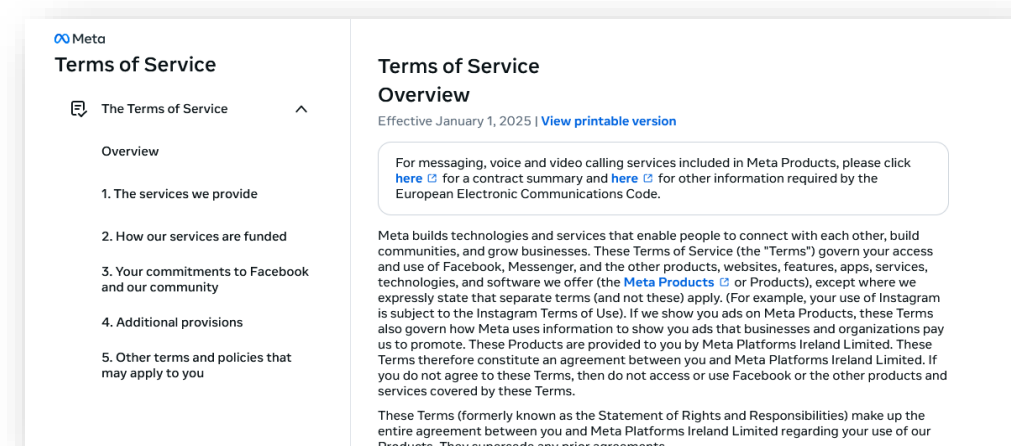

- **Anthropic's Claude AI** platform recognizes the design that features an “Accept” button
- **Open source tools**, such as Ariadne or Hawk Detector, recognize manipulative elements
 - Not easy to understand how to use
 - Do not present the definitions of the dark patterns
 - Do not enable the choice of what dark patterns must be identified
 - Some highlight suspicious elements, thus destroying the visual design

Tools for identificating phishing attacks

User challenges by accepting the terms of service and privacy policy

- Lawyers formulate policies and resolve disputes
- Internet users glance and scan the screen and expect to perceive the content
- Expectations of the user group are omitted
- The adapted legal provisions for fast learning should become a standard

Redesigned Facebook's Terms of Service

Agree to Facebook terms and policies

Terms of Service

-  The services we provide 
-  How our services are funded 
-  Your commitments to Facebook and our community 
-  Additional provisions 
-  Other terms and policies that may apply to you 

I agree

You must:

Use the same name that you use in everyday life.

Provide accurate information about yourself

only create one account and use it for personal purposes

not share your passwords

You cannot use Facebook, if:

You are under 13 years old.

You are a convicted sex offender

We've previously disabled your account for breaches of our Terms

You are prohibited from receiving our products, services or software under applicable laws.

Ideas for further activities

- As the Ethics Working Group, we could:
 - continue to collect data about covering the ethics topics in CS study programs
 - disseminate prepared teaching materials from the Ethics4EU project
 - stress the need for usable tools that inform users about dark patterns on the sites they visit
 - emphasize the importance of user-centered online contracts

**Vilnius
University**

Thank You!

Raising Ethical Awareness to Combat Dark Patterns
