Career Development Support Session - Questions

Discussion: Success Factors

- What factors help make a PhD project a success?
- Support received by supervisors, mentors, etc.
- Career path support
- Role of peers network, industry
- National association role and PhD association organisation
- Support of scientific communities

- Do/did you know what the expectations are for the next steps in your career?

Other Skills and Factors

- Role of leadership skills for career success of ECRs
- Leadership in activities beyond the PhD project
- What training and support have you received as PhD students?
- What skills would you liked to have obtained before entering your current career stage?

- Three things
  - you learned and will apply in your future career?
  - you learned and will never do again in your future career?
